

## Innovative Construction

First pressure-moulding material with two different degrees of hardness.

### Superior wearing comfort

This custom sports mouth guard has the perfect fit. During sports, the slight impression worked into the mouth guard stabilises the teeth in the lower jaw.

### Can be combined

Your braces treatment isn't affected.

### Highly effective

Wearing a sports mouth guard significantly reduces the risk of injury to lips, teeth, jaws, and temporomandibular joint.

### Impact absorbing

The impact is absorbed elastically and distributed with less force over a time delay.

### Hygienic

CETRON® cleansing powder, toothbrush and toothpaste are the best choice for gentle care.

## Precision-Fit Sports Mouth Guard

in just a few steps.

### 1 Consult with your dentist

Depending on the types of sports and recreational activities practiced, the dentist will advise you or your child on selecting the optimal sports mouth guard.

### 2 Impression

An impression of the upper jaw is the basis for sports mouth guards.

### 3 Producing the sports mouth guard

It is custom-made with precision in the laboratory. It covers the upper row of teeth and has a slight impression for the lower teeth.

### 4 Fitting and examination

The fit will be tested regularly by your dentist and adjusted as needed on an individual basis.

Provided by:

BIOPLAST® – the safe, ideal sports mouth guard for any application.

# BIOPLAST®

## What is it?

BIOPLAST® is a high-quality ethylene vinyl acetate (EVA) distinguished by its first-class impact absorption and outstanding elasticity despite its extremely light weight.

BIOPLAST® sports mouth guards for active sports are custom-made just for you by dental technicians, who work together with your dentist. This guarantees that your personal mouth guard will suit your particular needs for all types of sports.

## For any challenge

### Three sports mouth guard types

#### BIOPLAST® MASTER

- // proven, two-layer sports mouth guard
- // for all recreational sports
- // double-layer laminate construction for the best protection and comfort
- // 10 colour variations are available

#### BIOPLAST® XTREME

- // with integrated reinforcement section in the front teeth area
- // suited for contact sports, as it protects against hard and concentrated hits
- // double-layer laminate construction for the best protection and comfort

#### BIOPLAST® XTREME PRO

- // with integrated reinforcement area and supplemental hardelastic insert around the front teeth area
- // three-layer material structure for maximum protection and comfort
- // for professional contact sports with expected concentrated, hard hits (impact is distributed across a greater area)

**A large number of sports accidents include injuries to the teeth and the periodontium.**
