

Perfect Gloss for Porcelain and Composite

CeraMaster® • CompoMaster®

The unique blend of silicone and the even distribution of diamond particles as well as a variety of popular shapes for polishing porcelain and composite surfaces give restorations a superb shine.

CeraMaster Coarse and **CompoMaster Coarse** feature the same positive properties as the proven **CeraMaster** and **CompoMaster** polishers, but due to their bigger particle size these instruments are suitable for a more efficient contouring and pre-polishing.

Thanks to their shape durability and long tool life these polishers are economical; moreover they eliminate the need for expensive polishing pastes.

Proven Products for Better Dentistry

The diamond impregnated professional polishers

CeraMaster® Coarse • CeraMaster®

The **CeraMaster Coarse** polishers are designed for a quick finishing and pre-polishing of porcelain restorations and provide a smooth surface.

They particularly show their forte when adjusting ceramic coping margins made from materials such as aluminium oxide and zircon oxide.

For superpolishing **CeraMaster** polishers are recommended.

	Shape	Bullet	Knife	Cup	Mini-Point	KN7	WH6	unmounted Wheel*
ISO No.		040	090	065	030	125	120	220
